## Goodbye 2016! Happy 2017!

The New Year is almost upon us. Television shows, news outlets, and social media are taking to the air waves to either look back at <u>the best (and worst) of 2016</u> or to share tips on <u>following through</u> on those <u>New Year's resolutions</u>—<u>like a boss</u>.

Here at CNSI, we are following the year-end trend. We took pause this week to reflect back and thank our employees for all we achieved in 2016, including...

\* Launching evoBrix<sup>™</sup>, the <u>Next Generation Modular Medicaid Platform</u>

\* Receiving the <u>NASCIO Award</u> for <u>Cross-Boundary</u> <u>Collaboration and Partnership</u>

\* Developing the Nation's First <u>Vital Records Mobile App</u>

\* Becoming a <u>G2X Exchange Finalist</u> in the Federal Health IT Challenge

\* Receiving two <u>Alliance for Workplace Excellence</u> Awards

But innovation never takes a break. CNSI is already looking forward and putting 2017 into three words—<u>Collaboration</u>, <u>Modernization and Adaptability</u>. These are the terms that are going to drive our business forward as we continue to build cross-state partnerships, upgrade legacy systems and address the <u>changing landscape of Health IT</u>.

So goodbye 2016. Thank you for all the memories and we look forward to all that awaits in 2017!
